Customer benefits

- **Genuine marine design** with simple solutions, routine maintenance front area, engine block inspection hatches
- **Continuous compact power** with reference performances in its category
- **Global environment care** with low exhaust emissions, noise reduction and controlled fuel consumption at any running cycle
- **Latest safe technology** including electronic injection dynamic redundancy, high efficient ball bearing turbocharger, integrated circuits with 0 flexible hoses, and more…
- **Life cycle cost efficiency** with extended MTBO, modular concept reducing number of components and interfaces

Prime running power (PRP)

- Variable load with mean power calculated on 250 running hours
- No restriction on use if mean power ≥75% of nominal power
- Total operating time at 100% nominal power shall not exceed 500 hours per year
- 10% overload available 1 hour each 12 hours

Power definition

Standard ISO 3046/1 - 1995 (F)

Reference conditions

- Ambient temperature: 25 °C / 77 °F
- Barometric pressure: 100 kPa
- Relative humidity: 30%
- Raw water temperature: 25 °C / 77 °F

Fuel oil

- Relative density: 0.840 ± 0.005
- Lower calorific power: 42,700 kJ/kg
- Consumption tolerances: ± 5 %
- Air inlet limit temperature: 35 °C / 95 °F
Standard equipment

Cooling system
- Two stages cooling circuit with built-in HT thermostatic valves
- Integrated fresh water expansion tank with port/starboard filling provision
- High efficiency tubular heat exchanger module
- Gear driven centrifugal fresh water pump
- Self priming raw water pump with bronze impeller

Lubrication system
- Full flow lube oil filters duplex type - Centrifugal lube oil purifier
- Fresh water cooled lube oil heat exchanger module
- Port or starboard lube oil filling cap and dipstick
- Manual priming and draining pump

Fuel system
- Common-rail injection
- Two high pressure pumps (one per bench) with shielded high pressure injection rails and pipes
- Fuel oil filter duplex type
- Water separator

Intake air and exhaust system
- Double flow raw water cooled intake air heat exchanger module
- Fresh water cooled exhaust gas manifolds
- High efficiency dry turbochargers with ball bearing technology

Electrical system
- Voltage: 24V DC insulated
- Electrical starter
- Baseframe mounted control cabinet according to Classification Societies recommendations

Generator
- 50/60 Hz frequency, 4 poles
- Insulation / Heating class H/H
- Electronic voltage regulation
- IP23 protection, marine impregnation
- Double bearing
