

# 6 M26.3 with SCR

## IMO III / EPA IV - compliant

#### 4 stroke diesel engine, direct injection, common-rail

Bore and stroke 150 x 150 mm
Number of cylinders 6 in line
Total displacement 15,90 litres
Compression ratio 15/1
Engine rotation (ISO 1204 standard) counterclockwise

Idle speed650 rpmFlywheel housingSAE 1FlywheelSAE 14"

### **Our Advanced Engines with SCR Deliver:**

- A cleaner engine with the same power
- Up to 2% reduction in average fuel consumption
- High degree of installation flexibility
- Up to 25% noise reduction
- Compact, modular design
- Optimized maintenance schedule in line with the engine
- Approved by most IACS Members

One of the biggest advantages of the Baudouin SCR System is the high degree of installation flexibility. You have the freedom to place the tank, pump and cabinet up to 60m away from the catalyst. Designed with our customers in mind, our SCR system can be installed over the gearbox, over the engine, or in a stand-alone configuration which offers exponential options for installation. These configurations offer complete flexibility in both new builds and repowering projects.

## Design Support

Full design support is available from Baudouin to help you integrate the system into your installation. We can provide advice on mounting, materials, storage, maintenance and dimensioning of the urea storage tank volume.
